This manual describes how to install and test the MicroVAX 3100 Model 85, Model 95, and Model 96.

Revision Information: This manual supersedes EK-A0716-IN. B01
DATE 1995

Digital Equipment Corporation makes no representations that the use of its products in the manner described in this publication will not infringe on existing or future patent rights, nor do the descriptions contained in this publication imply the granting of licenses to make, use, or sell equipment or software in accordance with the description.

Possession, use, or copying of the software described in this publication is authorized only pursuant to a valid written license from Digital or an authorized sublicensor.

FCC NOTICE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.

Any changes or modifications made to this equipment may void the user’s authority to operate this equipment.

Operation of this equipment in a residential area may cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.

Warning!
This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

This warning only applies to the MicroVAX 3100 Model 85.

Achtung!
Dieses ist ein Gerät der Funkstörgrenzwertklasse A. In Wohnbereichen können bei Betrieb dieses Gerätes Rundfunkstörungen auftreten, in welchen Fällen der Benutzer für entsprechende Gegenmaßnahmen verantwortlich ist.

Diese Warnung bezieht sich nur auf Geräte des Typs MicroVAX 3100 Modell 85.

Attention!
Ceci est un produit de Classe A. Dans un environnement domestique, ce produit risque de créer des interférences radioélectriques, il appartiendra alors à l’utilisateur de prendre les mesures spécifiques appropriées.

Cette mise en garde ne s’applique qu’au MicroVAX 3100 modèle 85.

Preface

This manual describes how to install and test the MicroVAX™ 3100 Model 85, Model 95, and Model 96. It also refers to information on connecting the system to a network, connecting external options to the system, and booting the operating system.

Audience

This manual is intended for anyone who wants to install the MicroVAX 3100 Model 85/95/96. It is written for both experienced and inexperienced users.

Structure of This Manual

The procedure for installing the MicroVAX 3100 Model 85/95/96 is presented in only one chapter. Each section in the chapter represents a major step in the procedure and contains detailed instructions to follow.

Additional Information

See the MicroVAX 3100 Model 85/95/96 Operator Information manual for the list of related documents.
**Conventions**

The following conventions are used in this manual:

<table>
<thead>

<tbody>
<tr>
<td>MONOSPACE type</td>
<td>Text displayed on the screen is shown in monospace type.</td>
</tr>
<tr>
<td>italic type</td>
<td>Italic type emphasizes important information and indicates the complete titles of manuals.</td>
</tr>
<tr>
<td><strong>Note</strong></td>
<td>A note contains information that is of special importance to the user.</td>
</tr>
</tbody>
</table>
Installation Procedure

This chapter shows you, step by step, how to install the MicroVAX 3100 Model 85/95/96.

Step 1: Choosing a Suitable Location

Follow these guidelines when you choose where to place the system unit:

- Place the system unit where the room temperature is between 10°C and 40°C (50°F and 104°F) and the humidity is between 10% and 90%.
- Place the system unit at least 1 metre (3 feet) from heaters, photocopying machines, or other operating equipment.
- Place the system unit in a well-ventilated location.
- Place the system unit on a work surface, which is raised above the floor.
- Keep the air vents on either side of the system unit clear.
- Do not place the system unit on its side.
- Do not expose the system unit to direct sunlight or abrasive particles.

__________________________ Note ____________________________

A console terminal is required for this installation, but is not supplied with the system. You can order one from your Digital™ sales representative.
Step 2: Unpacking the System and Identifying the Parts

1. Unpack the system.

2. Make sure that you have all the parts listed on the packing slip. The following loose-piece accessory kit is shipped with all basic systems. If you do not have all the parts listed, contact your Digital Sales representative.

   1. System Unit
   2. DEC423 Terminal Cable (BC16E-25)
   3. One ThinWire™ Ethernet T-Connector (H8223) and Two Terminators (H8225)
   4. Standard Ethernet Loopback Connector (12-22196-01)
   5. RS232 to DEC423 Adapter (H8575-A)
   6. Power Cord
   7. Documentation and Software Licenses
Step 3: Connecting the Console Terminal

1. Connect one end of the terminal cable to modified modular jack (MMJ) port 3.

2. Connect the other end of the terminal cable to a DEC423 (MMJ) communications port on the console terminal. If your terminal has only RS232 ports, use the RS232 to DEC423 adapter (H8575-A) to provide an MMJ port on the terminal.

3. If you want, remove the label covering MMJ ports 0 and 1.

1 Terminal Cable
2 Label
Step 4: Connecting the ThinWire Terminator

1. Assemble the T-connector and the two terminators to form a ThinWire terminator.
2. Connect the ThinWire terminator to the system unit.

![Diagram of ThinWire Terminator Connection]

1. T-Connector
2. Terminator
Step 5: Connecting the Standard Ethernet Loopback Connector

Connect the standard Ethernet loopback connector (12-22196-01) to the system unit.

1 Standard Ethernet Loopback Connector (12-22196-01)
Step 6: Connecting the Power Cord

1. Ensure that the on/off switch is in the off (O) position.
2. Connect the power cord to the system unit.
3. Connect the other end of the power cord to an isolated, grounded circuit.

1. On/Off Switch
2. Power Cord
Step 7: Turning on the Console Terminal and System Unit

1. Turn on the console terminal. Wait until it completes its power-up test. (See the terminal documentation for more information.)

2. Check the terminal settings. See the MicroVAX 3100 Model 85/95/96 Operator Information manual for the list of correct settings.

3. Turn on the system unit by setting the on/off switch to the on (|) position.

![Image of On/Off Switch]

1. On/Off Switch
Step 8: Checking the Power-Up Test Results

The power-up test can take several minutes to complete, depending on the number of installed options you have and on which default settings you use:

- If the power-up test results on the screen are similar to the results in Figure 1–1, the system has passed the power-up test. Go to step 9.
- If the power-up test results on the screen are not similar to the results in Figure 1–1, the system has not passed the power-up test. Go to substep 1.

③ Power-up test completion
④ Specific error information on the test that failed
⑤ Status message
Note

Step 9 and step 10 are optional. However, step 11 is mandatory.

Step 9: Connecting the System to a Network
If you want to connect the system to a network, see the MicroVAX 3100 Model 85/95/96 Operator Information manual.

Step 10: Connecting External Options to the System
If you want to connect external options to the system, see the MicroVAX 3100 Model 85/95/96 Operator Information manual.

Step 11: Booting the Operating System
The system is supplied with factory installed software (FIS) on the system disk. Boot the operating system following the procedures in the OpenVMS™ Factory Installed Software User Information.
# How to Order Additional Documentation

## Technical Support
If you need help deciding which documentation best meets your needs, call 800-DIGITAL (800-344-4825) and press 2 for technical assistance.

## Electronic Orders
If you wish to place an order through your account at the Electronic Store, dial 800-234-1998, using a modem set to 2400- or 9600-baud. You must be using a VT terminal or terminal emulator set at 8 bits, no parity. If you need assistance using the Electronic Store, call 800-DIGITAL (800-344-4825) and ask for an Electronic Store specialist.
