FIELD CHANGE ORDER
NUMBER: KN7AA-F002

APPLICABILITY:

This "F" coded FCO will upgrade all T2028-AA field spares. This FCO does not affect the systems.

This FCO incorporates the following ECO: T2028-TWO002.

PROBLEM & SYMPTOM:

The T2028-AA LAMB module only allows longword aligned addressing on the XMI.

SOLUTION:

Installation of a new LGA gate array will allow lower address bits (1,0) to be passed on to the XMI. This FCO will replace the field spares with revision "E*".

QUICK CHECK:

Look for revision "E*" on the T2028 module spare.

PRE/CO-REQUISITE FCO: N/A

TOOL/TEST EQUIPMENT: N/A

FIELD INSTALLATION

1. Inspect the specified spares kit and order EQ-01686-01 Rev "E8", as required, to ensure that the module will allow longword aligned addressing on the XMI.

2. Place the new module in the kit and return the old module, labeled as "Down Rev", in the appropriate packing container.

***********************************************************************
*                        NOTE                                       *
***********************************************************************
* The replaced T2028-AA modules are to be returned immediately to SR #126 for US and GIA, and to Nijmegen for European material, via expedited transportation for upgrading.
